

BHOJRAJ MAHAJAN

Aspiring Data Analyst & Data Scientist | AI & Data Science Student

✉ bhojrajm24@gmail.com | ☎ +91 9244044913 | 🏠 Bhopal, Madhya Pradesh
🌐 LinkedIn | 📄 GitHub | 📷 Instagram

PROFESSIONAL SUMMARY

Motivated second-year AI & Data Science student with a strong passion for Python programming, data analysis, and machine learning. Focused on building practical projects that enhance problem-solving abilities and strengthen coding fundamentals. Committed to developing expertise in data-driven decision making and applying AI solutions to real-world challenges. Actively engaged in continuous learning through LeetCode problem-solving, GitHub project development, and sharing knowledge on LinkedIn.

TECHNICAL SKILLS

Programming Languages

- Python (Core & Advanced)
- Object-Oriented Programming
- Data Structures & Algorithms

Data Science & Analysis

- NumPy
- Pandas
- Matplotlib
- Machine Learning Fundamentals

Tools & Platforms

- GitHub (Version Control)
- Data Visualization Tools

Core Competencies

- Data Analysis
- Statistical Analysis
- Logic Building
- Problem Solving

PROJECTS

Mini Projects

Greeting with Speech (Text-to-Speech)

Developed a Python application that provides personalized voice greetings using text-to-speech functionality. Demonstrates understanding of Python libraries for audio processing and user interaction.

Alarm Application

Created a functional alarm system using Python to manage time-based notifications and alerts. Implemented scheduling features and user-friendly interface for setting multiple alarms.

Drinking Water Notification System

Built a Windows desktop notification system to remind users to stay hydrated throughout the day. Utilized Python's notification libraries to create periodic health reminders.

Currently working on more mini projects focused on data analysis, automation, and practical Python applications to enhance problem-solving skills and build a strong project portfolio.

Major Projects

Major projects currently in development phase. Working on building comprehensive data science applications that integrate multiple technologies and real-world problem-solving.

CURRENT FOCUS AREAS

- Python fundamentals, Object-Oriented Programming, and Data Structures & Algorithms
- Data Science foundations using NumPy, Pandas, and Matplotlib
- Logic-building and problem-solving through LeetCode challenges
- Building and maintaining projects on GitHub
- Sharing learning insights and technical content on LinkedIn
- Developing clean code practices and professional project workflows

EDUCATION

Sagar Institute of Science Technology and Engineering (SISTec-E)

Bachelor of Technology in Artificial Intelligence and Data Science

August 2024 - August 2028

CERTIFICATIONS & ACHIEVEMENTS

Certificate of Participation

Round 1 - Online MCQ Assessment Coding of Adobe India Hackathon

CAREER OBJECTIVES

To become a skilled professional in Data Analysis, Machine Learning, and practical AI applications. Seeking opportunities to collaborate on meaningful projects, contribute to data-driven solutions, and continuously expand knowledge in the field of artificial intelligence and data science. Open to internships, project collaborations, and learning opportunities that foster professional growth.
